

Carbon Controls is appointed as OleumTech Channel Value Added Reseller in Western Canada

FOOTHILL RANCH, Calif. December 15, 2016 – OleumTech® Corporation (www.oleumtech.com), a leading provider of M2M communications and industrial automation solutions, announced today that Carbon Controls of Calgary as an official Channel Value Added Reseller (VAR) to continue its expansion into Western Canada.

Carbon Controls offers a wealth of experience as well as a proven track record in the areas of Technical Sales, Application Assistance, first level technical support and manage local inventory for British Columbia, Alberta, Saskatchewan and Southwest Manitoba.

“We are excited to have Carbon Controls as a VAR. Carbon Controls increases the technical footprint into Western Canada. With their engineers and sales professionals, we look forward to having increased support for the end user customer in onshore oil & gas production, water/wastewater infrastructure and general process industries. OleumTech continues to strengthen our customer field access and our product portfolio,” said Robert Ward, VP International Business Development.

“OleumTech’s wireless industrial automation solutions are a perfect complement to our existing product offering. Our clients have requested innovative quality products that are reliable and can reduce their capital and operating costs. We look forward to a mutually rewarding partnership and we should see a great deal of success come from this relationship,” Cedric Rosario, Principal of Carbon Controls Ltd.

About OleumTech

OleumTech Corporation is a leading manufacturer of industrial automation systems that represents the new paradigm of remote monitoring and control for industries such as Oil & Gas, Refining, Petro-Chemical, Utilities and Water/Wastewater. With over 300,000 nodes deployed, the patented system eliminates costs associated with running cables and digging trenches with the use of its wireless tank monitoring, wellhead monitoring and peer-to-peer oilfield process automation solutions. Forming the foundation of a highly scalable, peer-to-peer wireless infrastructure, the OleumTech Wireless Systems enables “last mile” connectivity in any wireless SCADA and telemetry application.
