

PRESS RELEASE

Reonix Automation Teams Up with Carbon Controls Ltd as Exclusive Representative of the Reonix ScadaDroid R2 Alarm Dialer.

March 10, 2016, Calgary, AB – Reonix Automation is pleased to announce a new partnership with Carbon Controls Ltd, a Calgary-based sales and service representative of instrumentation and electrical control equipment.

As exclusive supplier for ScadaDroid Alarm Dialers in BC, Alberta and Saskatchewan, Carbon Controls Ltd will also represent other Reonix Automation solutions such as Hosted SCADA Solutions and VPN Solutions for clients unique needs.

“Carbon Control’s proven expertise in sales, service and integration of electrical and instrumentation equipment was a natural fit with Reonix Automation’s business in Western Canada”, says Allan Erion, Managing Director for Reonix Automation’s products in North America. “This new alliance will enable us to build a higher profile for ScadaDroid products, such as our cost-conscious R2 Call Out System, within the oil and gas, and wastewater management sectors”.

Developed in response to customers’ requests for Alarm Call Out Systems with built-in Cell Modem’s and built in connectivity to your plant SCADA or PLC System, ScadaDroid provides functionality in a compact package, are easy to set-up and meet all relevant global standards. Simplified installation and less need for add-on equipment, enable customers to benefit from immediate cost savings, a real advantage in today’s economy.

The Reonix / Carbon Controls Ltd partnership is a key component of Reonix’s ongoing commitment to expanding its Product Solutions within key industry sectors across Canada.

About Reonix Automation

ScadaDroid was built on the passion and experience of Reonix Automation. Reonix has provided high quality PLC and HMI programming services since 2002. Through this expertise, we expanded to product manufacturing to meet the growing needs of the automation industry. Reonix is committed to making automation processes a more operator friendly environment, utilizing tools such as alarm dialing, simple remote access, and intuitive user interfaces. Over this time, by using tools such as remote access, we have been able to save our customers costly site visits to fix minor problems and to respond quicker by eliminating travel time when there is an urgent issue that needs to be dealt with.

About Carbon Controls Ltd

Carbon Controls Ltd is a privately owned and operated Instrumentation, Electrical and Controls Company operating in Canada since 2001. We provide quality products and services to all sectors of industry. Carbon Controls represents products for Electrical Motor Control and Harmonic Solutions, Flow and Level Measurement as well as Safety Instrumentation: Fire & Gas, Heat and Smoke Detectors and Alarm Signalling Devices. All solutions are used in a broad range of applications worldwide.

Our vision is sharply focused; Carbon Controls Ltd strives to be Western Canada’s premier supplier of high quality instrumentation and electrical motor control equipment, all backed by unparalleled customer service and technical support.
